

James King

Watertown, NY | 315-921-8281 | james.king.usa2@gmail.com | [linkedin.com/in/jamesk2](https://www.linkedin.com/in/jamesk2) | British-American dual citizen

EDUCATION

Cornell University

Ithaca, NY

Bachelor of Science Degree in Mechanical Engineering | Minor in Business

Anticipated May 2028

Relevant Coursework: Thermodynamics | Statics | Electromagnetism | Differential Equations | Python | Linear Algebra | Mechanical Design | Dynamics | Waves | Structural Mechanics Simulation (FEA) |

South Jefferson High School

Adams, NY

Memberships: Founder, Rubik's Cube Club | President, Adams Library Community Club | Co-President, SADD

ENGINEERING EXPERIENCE

Knorr-Bremse (New York Air Brake)

Watertown, NY

Mechanical Engineering Testing Intern

May 2026 – Present

- Built a trip cock impact test bench from concept through physical completion, increasing actuation speed to 60 mph to meet updated federal safety strength requirements and cut validation cycle time.
- Sourcing, redesigning, and producing drawings for a \$20K+ hose flex test rack, with two additional units being built for deployment to international locations to standardize testing across the company.

Cornell Racing Formula SAE (Society of Automotive Engineers)

Ithaca, NY

Ergonomics Subteam / Part Designer

Nov 2024 - Present

- Designed and fabricated the 2026 competition steering wheel through multiple driver-tested iterations, cutting weight 30% from the previous year while improving grip ergonomics.
- Ran three-point bend tests across four carbon fiber sandwich layup configurations, selecting the lightest panel that exceeded the 700 N structural threshold, achieving a 32 N/g strength-to-weight ratio.
- Characterized thermal conductivity of proprietary brake pad materials, delivering test data that supported the team's design event technical review and justified final material selection.

Shaw Harbor Holdings

Adams, NY

Mechanical Engineering Intern

June 2024 - August 2025

- Designed and modeled CAD laser fixtures for manufacturing at Skip-Line LLC., reducing machine downtime by 25% and improving production efficiency.
- Co-developed enclosure prototypes in CAD that standardized components across product lines, reducing tariff exposure and cutting time-to-manufacture.

ACTIVITIES

CORE (Club of Rural Engineers)

Ithaca, NY

Member / Mentor

Sept 2024 - Present

- Mentor incoming rural students navigating college engineering programs and serve on the student board to expand resources and recruiting reach for underrepresented rural applicants.

Engineering Dean's Advisory Council (EDAC)

Ithaca, NY

Member

Sept 2025 - Present

- Selected by Admissions as one of a small number of undergraduates to advise the Engineering Dean on academic policy and student experience initiatives.

ADDITIONAL

Skills: Carbon Fiber Composites | Test Bench Design & Fabrication | CAD (Inventor, OnShape, SolidWorks) | Machining (Mill, Lathe) | FEA | GD&T | Thermal & Mechanical Testing | V&V | MATLAB | Python | 3D Printing | Microcontrollers | Technical Documentation |

Interest: Working on my 2013 BMW 335i | Running | Skiing | Drawing | Adirondack Mountains | Youtuber |
